

COACH'S MASTER GUIDE

Natural Movement Workshop · Format 3 Hours

Tarzan Movement · Version 1.0

"This is not a class. It is a laboratory where the body discovers its own wisdom."

Your role is not to train bodies, but to facilitate the rediscovery of the somatic intelligence that already lives in each person.

WORKSHOP OVERVIEW

BLOCK	DURATION	MAIN OBJECTIVE
Opening	30 minutes	Create secure container, establish group intent
Block 1: Body Awakening	45 minutes	Get out of the head, enter the body
Block 2: Guided Exploration	70 minutes	Introduce 4 elements with space for play
Pause / Hydration	15 minutes	Silent integration, rest
Block 3: Tribal		

Integration	50 minutes	Group cohesion, shared practice
Closure	30 minutes	Integrate experience, close container
Total	3 hours 20 minutes	<i>(includes 20 min buffer)</i>

FUNDAMENTAL PRINCIPLE

The success of this workshop is NOT measured by how many exercises they did or how "hard" they worked. It is measured by **how much genuine presence emerged** and how much the body-mind connection was rediscovered.

PRE-WORKSHOP: COACH PREPARATION

72 hours before

LOGISTICS

- ☐ Confirm space and schedule with organizer/venue
- ☐ Verify maximum capacity of the space (ideal: 12-15 people)
- ☐ Send pre-workshop email to confirmed participants
- ☐ Verify that your civil liability insurance is valid
- ☐ Prepare digital or physical waivers

PRE-WORKSHOP EMAIL CONTENT

Subject: Preparation for the Tarzan Movement Workshop [Date]

Body:

- What to bring: comfortable clothes (prefer barefoot or minimalist shoes), water, small towel
- What NOT to bring: expectations of "fitness class", phone in silent mode
- What to expect: exploration without fixed routines, respect for your individual rhythm
- Link to the digital waiver (complete before arriving)
- Reminder: report on injuries or relevant medical conditions

Previous Day

SPACE RECOGNITION

- ☐ Visit the physical space if possible (indoor/outdoor)
- ☐ Identify useful structures (bars, trees, rails, walls)
- ☐ Check soil conditions (safe for barefoot?)
- ☐ Detect potential risks (sharp objects, slippery surfaces)
- ☐ Plan group distribution (we do not delimit area, but visualize flow)

PERSONAL PREPARATION

- ☐ Physical check: Am I injured or tired? (If so, consider postponing)
- ☐ Mental/emotional check: Am I present or distracted?
- ☐ Define personal intention for the workshop (e.g. "create safe space", "honor group rhythm")
- ☐ Prepare playlist if you will use music (only Block 3, ambient/instrumental)
- ☐ Decide if you will wear elastic bands or other optional elements

ABOUT OPTIONAL MATERIALS

Elastic bands, foam rollers or other elements are NOT necessary but you can bring them if you feel that they will enrich the exploration. The rule: **the body and the ground are enough**. Any additional element should facilitate discovery, not replace presence.

2 Hours Before the Workshop

EARLY ARRIVAL IN SPACE

- ☐ Reach the space and make the final tour
- ☐ If it is outdoor: check weather, terrain conditions
- ☐ If it's indoor: open windows, create a minimalist atmosphere
- ☐ Place signage (if applicable) so that participants find the place
- ☐ Prepare area to leave personal belongings
- ☐ Meditate or focus for 10-15 minutes before the first participant arrives

30 Minutes Before

RECEPTION OF PARTICIPANTS

- ☐ Receive each person individually (eye contact, presence)
- ☐ Collect signed waivers (digital or physical)
- ☐ Do verbal micro-check: "How do you arrive today? Any injuries I should know about?"
- ☐ Invite to sit in a circle (without assigning specific places)
- ☐ Allow silence, DO NOT force social talk

OPENING (30 MINUTES)

OBJECTIVE: Create a safe container, break expectations of "fitness class", establish group presence.

0:00 - 0:05 Silent Arrival

SEQUENCE

- The participants are already sitting in a circle (they arrived in the previous 30 minutes)
- Coach also sits in the circle (same level, not elevated position)
- 5 minutes of shared silence
- NO background music, NO forced social talk
- Coach present, breathing consciously, observing the group without judging

PURPOSE OF SILENCE

This initial silence slows down the nervous system, marks a transition from the outside world to the practice space, and establishes that **we do not need to fill every moment with words or action.**

0:05 - 0:15

Presentation of the Space

WHAT TO SAY (SUGGETED SCRIPT)

"Welcome. This is not a fitness class. There are no mandatory exercises, there is no 'doing it right' or 'doing it wrong'. This is a laboratory where your body explores, feels and observes."

"I'm not going to tell them what to do all the time. I'm going to propose explorations and you decide how to inhabit them. If something doesn't feel safe or suitable for you today, just don't do it. No one will judge them."

"Safety protocol: If you feel acute pain (not normal discomfort, but pain), stop immediately. Raise your hand if you need help. There's no hurry. There is no physical goal to achieve today."

✓ COMMUNICATE

- "This is an exploration laboratory"
- "Your body already knows, just listen"
- "There are no levels, just curiosity"
- "You can stop whenever you want"

✗ AVOID SAYING

- "We are going to work hard today"
- "At the end of the workshop you will be able to do X"
- "This is to get in shape"
- "Follow me and do what I do"

0:15 - 0:30

Circular Check-in

INSTRUCTIONS FOR THE GROUP

"We're going to do a round of presentation. Each person briefly shares:"

- **Your name**
- **Your sports past** (if there is one): Did you practice any sport? What is your relationship with movement?
- **Injuries you want to share:** Any current or chronic injury that we should know.
- **Your main motivation:** Why are you here today?
- **OPTIONAL - If you feel fear:** Is there anything that generates fear or resistance in you today? (no one is obliged to share this)

"While each person speaks, the others just listen. No comments, no advice. Only presence."

ROLE OF THE COACH DURING CHECK-IN

- **DO NOT comment on** each intervention (avoid "how interesting", "I understand", etc.)
- **YES, thank** with a gesture or simple "thank you" after each person
- **Observe patterns:** Many shoulder injuries? Group with trauma from gyms? This will inform your facilitation
- **Detects risk signs:** If someone mentions a recent acute injury, talk to that person at the end of the round
- **Allow silences:** Not everyone will speak the same. Some will say little, others a lot. Both valid.

IF SOMEONE SHARES TRAUMA OR DELICATE EXPERIENCE

Example: "I was sexually abused and movement scares me" or "I have severe anxiety."

Coach's response: Thank the vulnerability without dramatizing. "Thank you for sharing that. You are welcome here just the way you are. Let me know if you need to change anything during practice." Then continue. DO NOT turn the workshop into group therapy.

BLOCK 1: BODY AWAKENING (45 MINUTES)

OBJECTIVE: Leave the head (thought, expectations, comparison) and enter the body (feeling, breathing, contact with the ground).

0:30 - 0:45 Support Exploration

1. SITTING → OBSERVE WEIGHT IN ISCHIOS (5 MIN)

- Instruction: "Stay seated. Close your eyes. They feel the weight of their body on the ground."
- Guide questions (calm voice, long pauses between questions):
 - *"Where exactly do they feel the contact with the ground?"*
 - *"Is your weight distributed equally or more to one side?"*
 - *"What happens if they move their pelvis slightly forward... backwards?"*
- Silence of 2 min for individual exploration

2. QUADRIUPEDIA → HANDS AND KNEES ON THE GROUND (5 MIN)

- Slow transition from sitting to quadrupedia (no hurry, everyone at their own pace)
- Instruction: "Hands under the shoulders, knees under the hips."
- Guide questions:
 - *"How is the weight distributed between hands and knees?"*
 - *"What if they press more with their hands? And with the knees?"*

- *"Is your spine neutral or arched?"*

3. FLOOR TRANSITIONS ↔ STANDING (5 MIN)

- Explore different ways to get up and return to the ground
- Instruction: *"There is no correct way. Explore different ways to stand up from the ground."*
- Coach can demonstrate 1-2 options, then let them experiment
- Observe: Do they use hands? Do they turn? Do they jump? All valid

FINAL INTEGRATIVE QUESTION

"Sto sto a moment. What parts of your body are really awake now? Which ones are still asleep or numb?"

Allow 1 minute of silence so that they integrate the observation internally.

0:45 - 1:05 Basic Gorilla

INTRODUCTION (2 MIN)

"The Gorilla is locomotion in quadrupedia. It's not about literally imitating a gorilla, but exploring how your body moves when your four limbs are in contact with the ground."

SLOW QUADRUPED LOCOMOTION (8 MIN)

- Demonstrate: advance slowly (right hand + left foot → left hand + right foot)
- Instruction: "Go slowly. Very slow. There's no hurry. They feel every transition of weight."
- Allow free exploration through space for 5 min
- Include **observation pause** at 3 min: "Stoop. Conscious breathing. Observe his body."

VARIATIONS (10 MIN)

- **Lateral:** "What if they move sideways instead of forward?"
- **Reverse:** "Can you move backwards while maintaining control?"
- **Circles:** "Draw a circle with your trajectory."
- **Observation break** every 5 minutes: silence, breathing, body check

FACILITATION STYLE: QUESTIONS, NO ORDERS

Instead of: "Now go faster"

Say: "What if they speed up the pace a little? How does your breathing change?"

Instead of: "Keep your back straight"

Say, "Where is your column right now? Neutral? Arched? Rounded? Just observe."

1:05 - 1:15

First Group Integration

MIRROR MOVEMENT (COUSES) - 10 MIN

- Form couples (let them choose naturally, or assign if the group is shy)
- Instruction: "One person leads, the other follows like a mirror. Without speaking. Only movement."
- Leader explores quadruped movements, transitions, simple body gestures
- After 4 min, exchange roles
- Purpose: **See another, be seen, synchronize without words**

COACH'S OBSERVATION

During this exercise, observe dynamics of power, shyness, creativity. DO NOT correct, just observe. If someone gets frustrated because "can't go on," come closer and whisper: "It's not about making it perfect. Just watch and respond."

BLOCK 2: GUIDED EXPLORATION (70 MINUTES)

OBJECTIVE: Introduce the 4 Tarzan movement elements (Gorilla, Gibbon, Orangutan, Chimpanzee) with enough space for play and personal discovery.

1:15 - 1:40

Gibbon: Suspension and Balance

IF THERE IS A BAR OR STRUCTURE TO HANG (20 MIN)

Passive Hangings (5 min):

- Instruction: "Just hang up. Extended arms. Let your weight hang."
- Question: "Where do you feel tension? Shoulders? forearms? Spalda?"
- Duration: 10-30 seconds each attempt, rest, repeat

Active Hangings (5 min):

- Retract scapulae (pull shoulders down and back)
- "What muscles are activated when they do this?"

Lateral Displacements (10 min):

- Move from side to side on the bar
- Alternate hands (mono bar)
- Variation: Suspension with feet also in contact with structure

IF THERE IS NO BAR (ALTERNATIVES ON FLOOR/SCALE) - 20 MIN

Balance in Ground Lines (10 min):

- Walking on imaginary line or tape on the ground
- Eyes open → eyes closed → eyes half closed
- Arms extended, arms to the sides, hands on the head (variations)

Imaginary Rail Walking (10 min):

- Walk on curb, low trunk, or painted line
- Barefoot preferably (connection with surface)
- Explore different speeds and postures

PROGRESSION: INDIVIDUAL → COUPLES

After individual exploration, invite to work in pairs: one person in bar/balance, another attends/observes. Rotate roles.

Benefit: Builds trust, allows safe spotting, creates group connection.

FEAR PRACTICE (TRAUMA-INFORMED)

Key instruction: "Where do they feel their limit today? Don't cross it. Just observe it. Fear is information, not an obstacle to overcome."

If someone freezes or shows signs of panic (shallow breathing, dissociation), approach and offer: "Do you want to come down? It's perfectly fine. There is no pressure."

1:40 - 2:05

Orangutan: Core and Control

LOW SUSPENSIONS (IF STRUCTURED) - 12 MIN

- Hang on a low bar (feet touching the floor or almost)
- Explore: What happens if they lift feet? A foot? Both?
- Slow transitions between positions
- Do not force time in suspension, respect fatigue

HOLLOW BODY ON THE FLOOR - 13 MIN

- Lying on your back, arms outstretched over your head
- Raise your head and shoulders slightly, activate core
- Variations: extended legs, bent legs, alternate
- "Where do they feel work? Abdomen? Lower rest? Cull?"
- Duration: 10-30 seconds per attempt, generous breaks

DEAD HANGS WITH CONSCIOUS BREATHING - 10 MIN (IF THERE IS A BAR)

- Hang up and focus ONLY on breathing
- "Inhale through the nose counting 4... exhale through the mouth counting 6"
- Objective: to maintain calm breathing under physical tension
- Duration: what each person can without compromising breathing

RECURRING QUESTION THROUGHOUT THE BLOCK

"Where is your breathing right now?"

Repeat this question every 5 minutes. The goal is to anchor attention in breathing as a measure of presence and safety.

2:05 - 2:25 Chimpanzee: Free Play

INTRODUCTION (2 MIN)

"The next 20 minutes are free exploration. They can combine everything we have seen: quadrupedia, suspensions, balance. They can invent new moves. There are no rules, just curiosity. Play."

FREE EXPLORATION (18 MIN)

- Coach withdraws from the center, observes from the periphery
- DO NOT correct except for a clear risk of injury
- Some will continue to explore alone (valid)
- Others will form spontaneous groups (valid)
- Some will rest and observe (also valid)

ROLE OF THE COACH DURING FREE PLAY

- **Observe:** Who plays with whom? Who isolates himself? Is there competition or collaboration?

- **Intervene only if:** Someone is at risk of injury, someone explicitly asks for help
 - **DO NOT intervene if:** Someone is "resting too much" (respect individual rhythm)
 - **Celebrate internally:** This is the phase where the methodology is integrated without instruction
-

PAUSE / HYDRATION (15 MINUTES)

2:25 - 2:40

Active Silence

PAUSE STRUCTURE

- **It is NOT a break to check phones:** Invite to leave saved devices
- **YES, it's space to:** Hydrate, go to the bathroom, sit quietly, talk spontaneously if it arises
- **Coach available:** For 1-on-1 questions, but not forced interaction
- **Music:** None, or very soft ambient (max 20% volume)

WHAT TO DO IF SOMEONE ASKS: "ARE WE OKAY?"

Answer: "There is no 'good' or 'bad' here. How do YOU feel? That's the only measure that matters."

BLOCK 3: TRIBAL INTEGRATION (50 MINUTES)

OBJECTIVE: Group cohesion, shared practice, creation of collective memory. Movement as a vehicle of human connection.

2:40 - 3:05 Group Fluid Circuit

CIRCUIT DESIGN (5 MIN OF EXPLANATION + PRACTICE)

Create a simple sequence that everyone can follow:

- **Station 1:** Floor (transitions, rolls, quadrupedia)
- **Station 2:** Suspension (bar, hollow body, or balance)
- **Station 3:** Locomotion (Gorilla from one point to another)
- **Back to the beginning**

"It's not about speed or repetitions. It's about flowing together, each at their own pace, creating a stream of shared movement."

COLLECTIVE FLOW (20 MIN)

- Everyone starts together but everyone advances at their own speed
- Some will complete the circuit 3 times, others 1 time (both valid)
- Coach can play **SOFT ambient music** (optional):
 - Instrumental, without lyrics
 - Ambient, downtempo, non-energy gym type

- Low volume (30-40% maximum)
- Objective is NOT performance, it is **shared presence**

IF SOMEONE STARTS COMPETING

Signal: accelerates a lot, constantly looks at others, makes striking movements to demonstrate skill.

Coach's Intervention: Approach in pause and whisper: "What is driving your speed now? Is it genuine curiosity or something external?" Don't judge, just invite to observe.

3:05 - 3:20 **Collective Game**

CHOOSE GAME ACCORDING TO GROUP ENERGY

Observe: Is the group energized or tired? Cohesioned or scattered?
Choose the appropriate game.

OPTION A: "FOLLOW THE LEADER" IN CIRCLE (15 MIN)

- All in a circle, each person leads for 30-60 seconds
- The leader proposes a movement (quadruped, suspension, gesture), all follow
- Continuous rotation until everyone has led
- **Purpose:** See diversity of interpretations, build confidence in

spontaneous leadership

OPTION B: "GROUP MIRROR" (15 MIN)

- One person in the center, all the others form a circle around
- The person in the center moves, the circle imitates as a mirror
- Change central person every 2 minutes
- **Purpose:** Practice of collective presence, synchronization without words

OPTION C: "HUMAN ROPE" (15 MIN - ONLY IF THERE IS A BAR)

- They all hang from the bar simultaneously, forming a chain
- Objective: to maintain collective suspension for as long as possible
- If someone goes down, everyone goes down (solidarity, not individual competition)
- **Purpose:** Shared resistance, interdependence

3:20 - 3:30 Shared Observation

SEQUENCE

- Sit in a circle again (same position as at the beginning)
- 5 minutes of **absolute silence**, eyes closed
- Instruction: "Close your eyes. Observe your body. What do you feel now compared to when you arrived 3 hours ago?"

- Allow integration to be internal (they do NOT need to verbalize)
- After 5 minutes, open your eyes slowly, keep quiet for 1 more minute

PURPOSE OF THIS SILENCE

Anchor the experience. Allow the nervous system to register the change without intellectualizing it. Create somatic memory, not just mental.

CLOSING (30 MINUTES)

OBJECTIVE: Integrate experience, close container in a ceremonial way (not abrupt), prepare for the transition back to the outside world.

3:30 - 3:40 Guided Cool-down

SLOW PASSIVE STRETCHING (10 MIN)

- **Wrists:** Flexion, extension, rotations (2 min)
- **Shoulders:** Slow circles, cross stretches (3 min)
- **Hips:** Pigeon pose, rotations, openings (3 min)
- **Column:** Cat-cow, child's pose (2 min)

"Don't force it. Just invite your muscles to let go. Deep breathing in each stretch."

DIAPHRAGMATIC BREATHING 4-6-8

- Lying on your back or sitting comfortably
- **4 seconds:** Inhale through the nose
- **6 seconds:** Hold
- **8 seconds:** Exhale through the mouth
- Repeat 5 cycles
- Coach guides with soft voice, counts out loud

3:40 - 3:55

Closing Circle

SHARING ROUND (OPTIONAL FOR PARTICIPANTS)

"We're back to the circle. If anyone wants to share something about their experience today, this is the space. There is no obligation. Silence is also valid."

- **Coach does NOT force** everyone to talk
- **Respect long silences** (it can be 2-3 minutes without anyone speaking, it's okay)
- **DO NOT comment on** each intervention with analysis or advice
- **YES, thank** each share with a simple gesture

IF NO ONE SPEAKS (PERFECTLY VALID)

After 3-4 minutes of respectful silence, the Coach can share:

"We don't need words to know that something happened here today. What each of you discovered was already living in your body. We only removed what was in the way."

IF SOMEONE SPEAKS: COMMON TOPICS AND HOW TO RESPOND

SHARE OF THE PARTICIPANT

COACH'S RESPONSE

"I realized how much tension I carry on my shoulders"

"Thank you for sharing that. Observation is the first step."

"I thought it would be more difficult / easier"	"Expectations always lie. What was the real thing?"
"I don't know if I did it right"	"There is no 'good'. There is only honest or dishonest with your body. Were you honest?"
"I felt fear in the suspensions"	"Fear is information. Did you hear it or ignore it?"

COACH SHARING (GROUP OBSERVATION)

After the participants speak (or if no one speaks), the Coach shares ONE observation about the entire group (without pointing out individuals):

"What I observed today was a group that arrived with a lot of mental energy, and gradually released it to enter the body. I saw less comparison and more curiosity as we moved forward. That's weird and valuable."

Rule: Celebrate what emerged, never criticize what was missing.

3:55 - 4:00 Final Logistics

PRACTICAL INFORMATION

- **Upcoming workshops:** Mention date/place if confirmed
- **How to continue practicing:** "They don't need the group to practice. The group only amplifies. You can explore this at home, in a park, alone."
- **Coach Contact:** Email / Instagram for questions or follow-up

- **Reminder about recordings:** "You can record and share your experience if you want. Only respect the privacy of other participants (ask permission before including them in videos/photos)."

CEREMONIAL CLOSING

"Thank you for your presence today. What they discovered here was already theirs. I just reminded them. You can leave when you're ready."

DO NOT force an abrupt exit. Allow some to stay talking, others to leave immediately. Both valid.

POST-WORKSHOP: COACH INTEGRATION

After the Event (10-15 min)

JOURNALING PERSONAL

- ☐ What emerged in the group that you didn't expect?
- ☐ What worked well in your facilitation?
- ☐ What would you adjust for the next workshop?
- ☐ Were there moments when you intervened more or less?
- ☐ How do you feel physically and emotionally now?

RITUAL OF CLOSING THE SPACE

- ☐ If it is a natural/outdoor space: Thank the place in silence
- ☐ If it is indoor: Pick up, leave clean, ventilate
- ☐ Take 5 minutes of personal silence before returning to your routine

ADMINISTRATIVE REGISTRY

- ☐ Register workshop in app/TM platform (if applicable)
- ☐ Note attendance, incidents, relevant observations
- ☐ File signed waivers (digital or physical, minimum retention 12 months)

TRANSVERSAL ELEMENTS (DURING THE WHOLE WORKSHOP)

Coach's language

✓ USE

- "What if...?"
- "Explore..."
- "Observe..."
- "Where do you feel...?"
- "How does it change when...?"
- "I invite you to..."
- "What emerges if...?"

✗ AVOID

- "Do this"
- "You have to..."
- "Stronger / faster"
- "Everyone must..."
- "This is wrong"
- "Come on, push!"
- "Don't stop now"

Trauma-Informed Protocol

FUNDAMENTAL PRINCIPLES

- **A/B options always:** "Do you prefer to try this or that?" never "Do this"
- **Never touch without explicit verbal permission:** "Can I touch your shoulder to show you?" → wait YES of course
- **Respect signs of discomfort:**

- Dissociation: lost gaze, absence
- Retraction: closed posture, away from the group
- Superficial breathing: hyperventilation or apnea
- **Invitation language, not imperative:** See language table above

IF YOU DETECT POSSIBLE FLASHBACK OR DISSOCIATION

Apply Coach Toolkit Protocol:

Grounding: Approach calmly, say his name gently, invite to feel contact with the ground

Guided breathing: "Inhale 4 seconds... exhale 6 seconds..." (calm voice)

Calm eye contact: If they accept, maintain presence without invading

Allow safe exit: "Do you want to sit down for a moment? Go out for air?" (not judging)

NEVER: Force to continue, minimize ("nothing happens"), or make group attention center

Physical Safety Protocol

NON-NEGOTIABLE RULES

- **Maximum recommended height:** 1 meter (Essential level in workshops open to the general public)
- **Mandatory spotting:** In suspensions >50cm, always have a partner assisting
- **Constant visual check:** Does anyone look at risk? Intervene immediately

- **Universal stop sign:** Raise your hand = I need help / immediate stop
- **Acute pain = stop:** Repeat constantly: "Acute pain (not discomfort) means stop now"

Music (If Used)

✓ APPROPRIATE

- Only in Block 3 (Tribal Integration)
- Ambient, instrumental, without lyrics
- Low volume (30-40% maximum)
- Slow-medium tempo (60-90 BPM)
- Examples: Brian Eno, Ólafur Arnalds, Nils Frahm

✗ FORBIDDEN

- Energy music like gym
- Reggaeton, EDM, aggressive rock
- Songs with explicit lyrics
- High volume that prevents hearing self-respiration
- Music during opening, closing or moments of silence

ADAPTATIONS ACCORDING TO CONTEXT

If it is OUTDOOR (Park / Forest)

ADJUSTMENTS TO THE PROGRAM

- **Opening:** Add 10 min of "Environment Observation"
 - Sitting in a circle, eyes closed
 - "What do they listen to? Birds? Wind? Traffic?"
 - Open your eyes slowly, observe nature without judging
- **Barefoot practice:** If the ground is safe (grass, soft soil), invite to take off your shoes
 - "They feel the texture of the floor with their bare feet"
 - Warning: check first for sharp objects
- **Tarzan Social Protocol:**
 - Kindly greet passers-by who pass by
 - Do not block paths or areas of common use
 - If authority asks to stop practice: immediate obedience, thank, move

If it's INDOOR (Gym / Studio)

ADJUSTMENTS TO THE PROGRAM

- **Create a minimalist atmosphere:**
 - Remove/cover mirrors if possible (fabrics, cartons)
 - Turn off aggressive fluorescent lights, prefer natural or warm light
 - Ventilate: open windows for fresh air
- **Do not delimit the physical practice area** (do not put cones, tapes), but verbally communicate the available space
- **Use of gym bars/structures:** Take advantage of pull-up bars, rings, parallels if available

If the Group is >15 People

SPECIAL CONSIDERATIONS

- **Consider co-facilitator:** For proper supervision and safety
- **Divide into subgroups for Block 2:**
 - Group A: Gibbon | Group B: Orangutan
 - Halfway through the block, swap
 - Avoid saturation of structures (eg: all in a single bar)
- **Maintain complete closing circles:** DO NOT split for opening or closing, only for technical practice
- **Increase check-in time:** If there are 20 people, the circular check-in can take 40 min → adjust timeline

MATERIALS AND EQUIPMENT

Minimums (Essential)

- **Nothing.** The entire workshop can be done on the ground without any additional equipment.

Ideals (Enrich Practice)

- Pull-up bar or structure to hang
- Rail or balance line (can be adhesive tape on the floor)
- Plenty of water for participants
- Small towels (optional)

Optional (At the Coach's Discretion)

- **Elastic bands:** If the coach feels that they can enrich resistance exploration (NOT mandatory, DOES NOT replace body)
- **Foam rollers:** For extended cool-down if the coach considers it useful
- **Mats/mats:** Optional, we generally prefer direct floor for real touch connection
- **Portable speaker:** For ambient music in Block 3 (if there is no sound

system)

PRINCIPLE: THE BODY AND THE FLOOR ARE ENOUGH

Any additional element should **facilitate discovery**, not replace presence. If you have doubts about bringing something, ask yourself: "Will this help genuine exploration or will it only complicate it?"

COMPLETE PRE-WORKSHOP CHECKLIST

72 HOURS BEFORE

- ☐ Confirm space and schedule with organizer/venue
- ☐ Send pre-workshop email to participants
- ☐ Verify current liability insurance
- ☐ Prepare waivers (digital or physical)
- ☐ Confirm number of attendees

PREVIOUS DAY

- ☐ Physical space recognition
- ☐ Identify useful structures and risks
- ☐ Prepare playlist (if you will use music)
- ☐ Personal check: physical/mental state
- ☐ Decide if you will wear elastic bands or other optional
- ☐ Define personal intention of the workshop

2 HOURS BEFORE

- ☐ Getting to space
- ☐ Final route of the area

- ☐ If outdoor: check weather and terrain
- ☐ If indoor: ventilate, adjust lighting
- ☐ Prepare area for belongings
- ☐ Meditate/focus 10-15 min

30 MINUTES BEFORE

- ☐ Receive participants individually
- ☐ Collect signed waivers
- ☐ Verbal micro-check of injuries/status
- ☐ Invite to sit in a circle
- ☐ Maintain an atmosphere of silence present

FREQUENTLY ASKED QUESTIONS FROM THE COACH

QUESTION/SITUATION	SUGGESTED COACH RESPONSE
"Is this yoga?"	"No. Yoga has fixed postures and specific tradition. Here we explore movement without default form."
"How many calories am I going to burn?"	"I don't know, and it's not the goal. This is reconnecting with your body, not optimizing it for a number."
"Can I record?"	"Yes, you can record your own experience and share it. Only respect the privacy of other participants: ask permission before including them in videos/photos."
Someone wants to compete / demonstrate skill	"There are no levels here. A conscious beginner is more 'advanced' than a disconnected athlete. What drives you to go faster?"
Someone gets frustrated: "I can't do this"	"It's not about 'power'. It's about exploring your limit today, not crossing it. What is your body telling you?"
"Am I going to be able to [do X specific movement] at the end?"	"I don't promise physical results. I promise a space to discover what already lives in you. Movements are vehicle, not destination."
"Why is there no music?" (in Blocks 1-2)	"Because we want to listen to your breathing, your supports, your body. Music can distract from that internal listening."

Someone asks for constant technical correction

"There is no 'correct' technique here. Do you feel safe? Does it feel honest? Those are the only measures that matter."

FINAL REMINDERS FOR THE COACH

"Your success is not measured by how much you taught, but by how much space you created for them to discover."

THE 5 PILLARS OF YOUR FACILITY

1. **Presence on Performance:** You don't need to be the best moving. You need to be present.
2. **Questions about Orders:** "What if...?" instead of "Do this."
3. **Silence over Noise:** Don't fill every moment with words. Silence is pedagogical.
4. **Observation on Correction:** Go without judging. It intervenes only when it is necessary for security.
5. **Tribe on Individuals:** You build community, you don't train isolated bodies.

HOW DO I KNOW IF THE WORKSHOP WAS SUCCESSFUL?

It is **NOT** successful if:

- Everyone made many difficult moves
- They told you "how hard it was" or "how tired we are"
- They achieved X number of repetitions or duration

YES it is successful if:

- Someone said "I felt my body differently"
- There were comfortable silences and genuine presence
- People were more connected with themselves
- Collective memory was created (group feels tribe, not class)

TARZAN MOVEMENT

Coach's Master Guide · Workshop 3 Hours v1.0

The right movement arises from feeling correctly, not from training correctly.
